# Energy & Water Reporting Service

## Your one stop to meet Ontario's energy and water reporting requirements

Effective July 2018, the Government of Ontario requires certain large buildings to report their energy and water use every year. As a turnkey sub-metering provider, we've extended our services to manage this reporting so that you don't have to.

### PARTNER WITH US FOR:

- ✓ end-to-end management of utility and building data collection, verification, and reporting
- ✓ single building or portfolio wide reporting service
- ✓ management of the online reporting tool, ENERGY STAR® Portfolio Manager
- ✓ peace of mind without additional administrative responsibilities

# Enercare's Reporting Service

We've built our reputation around delivering exceptional client service – as a reporting service subscriber, you will receive:<sup>1</sup>

## Initial Service Setup

- ✓ Utility and building information will be collected and verified
- ✓ An ENERGY STAR® Portfolio Manager account will be created and managed by a dedicated resource at Enercare
- ✓ Where communication with the local utility is required to collect water, electricity, gas, and/or fuel usage data, we'll manage this on your behalf
- ✓ We will work directly with the Ministry of Energy to setup properties for reporting

## On-going Reporting and Data Verification

- ✓ Consumption data will be gathered and stored centrally by Enercare and uploaded to the ENERGY STAR® Portfolio Manager on an annual basis
- ✓ Data will be verified by a certified engineer to meet regulatory requirements
- ✓ Enercare will keep you informed on your reporting status and of any changes to the regulatory environment

## Ontario Regulation 20/17: An Overview

In February 2017, the Government of Ontario passed Regulation 20/17: Reporting of Energy Consumption and Water Use as part of the province's action plan to reduce greenhouse gas emissions. Certain large buildings are now required to report energy and water use and other property details on an annual basis.

### Reporting Requirements

- Keep up-to-date building information such as property identification information, property use details, and gross floor area
- Report consumption amounts for water, electricity, gas and fuel usage
- Conduct an independent audit to verify building information and consumption every 5 years
- Report through the ENERGY STAR® Portfolio Manager, an interactive tool managed by Natural Resources Canada

	Building Size	Reporting Date
<b>Multi-residential</b>	100,000+ sq. ft.	July 1, 2019
	50,000+ sq. ft.	July 1, 2020
<b>Commercial/Industrial</b>	250,000+ sq. ft.	July 1, 2018
	100,000+ sq. ft.	July 1, 2019
	50,000+ sq. ft.	July 1, 2020

## Beyond Compliance: Getting the Most Out of Your Reporting Service

Benchmarking can be a powerful tool for maximizing efficiency of your building operations. Interested in going beyond compliance reporting? Ask how we can help.
