

About Enercare

Enercare Commercial Services owns and manages over 20,000 pieces of commercial HVAC equipment through our rental program. Knowing how to properly design and size complex HVAC systems to maximize longevity is at the core of our business. We are part of the Enercare family, a premier provider of essential home services and energy solutions and Canada's largest non-utility electricity, water, gas, and thermal energy sub-metering provider.

VIEW Equipment Evaluation Program

**Validation, Inspection
and Equipment Walk-through**

enercare™

HOTEL/MOTEL

Avoid costly downtime and repairs in your business

Are you considering how mechanical equipment affects your business?

Because we know that operational health of HVAC equipment is not always top of mind, Enercare offers a Validation, Inspection and Equipment Walk-through (VIEW) program — a technician-based survey designed to assess the state-of-repair of your HVAC and hydronic equipment.

MULTI-RESIDENTIAL BUILDING

Don't Leave Money on the Table – Properly Size Your Equipment

Having equipment with the wrong specifications can cost you thousands in added expense. In addition to assessing HVAC installations, we'll help you understand if the equipment is properly sized and right for your application.

RETIREMENT COMMUNITY

Ask us about low-cost ways to help reduce energy usage

Building an Action-Oriented Plan

1 Equipment Inspection

An Enercare Technician will survey and assess the operating condition of your HVAC and hydronic equipment, detailing each unit on the site.

2 Easy to Use Report with Engineer-Reviewed Recommendations

Based on the survey, an exhaustive report will be prepared. The standard report includes:

- ✓ Executive summary highlighting the key findings
- ✓ Summary of the equipment status and needed repairs
- ✓ Budgetary estimate for repairs
- ✓ 10 year capital budget forecast for equipment replacement (if applicable)
- ✓ Detailed evaluation forms for each unit
- ✓ Site map and equipment lay-out
- ✓ Equipment photos

3 In-person Presentation of Results

When to Get an Inspection

The VIEW Equipment Evaluation Program is valuable for:

- Validating legacy equipment purchased through a building acquisition
- Implementing an inventory management system
- Capital budgeting and strategic planning
- Managing contractors and assessing whether installations have been done as per regulations and manufacturers recommendations
- Identifying energy conservation initiatives
