# Tankless Reverse Osmosis System Filter Replacement

● #1 Pre-Filter (Black)    ● #2 Carbon Filter (Dark Grey)

● #3 Reverse Osmosis Membrane (Blue)

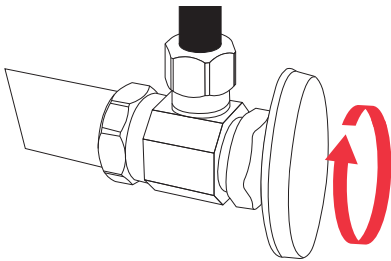

THIS PACKAGE CONTAINS YOUR PRE-FILTER, CARBON FILTER, AND REVERSE OSMOSIS MEMBRANE FOR YOUR TANKLESS REVERSE OSMOSIS SYSTEM. PLEASE FOLLOW THE STEPS BELOW TO REPLACE YOUR FILTERS AND MEMBRANE.

## Stage 1: Filter Replacement Set Up

NOTE: Start by clearing the area around your Reverse Osmosis System under the sink and ensure you have enough room to access the filters through the magnetic top cover of your system.

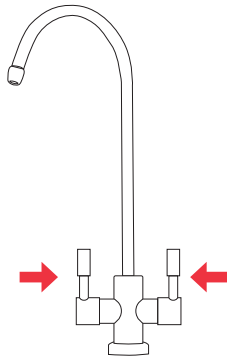

1

Close the main shut-off valve on the cold water supply line connected to the Tankless Reverse Osmosis System by turning it clockwise.

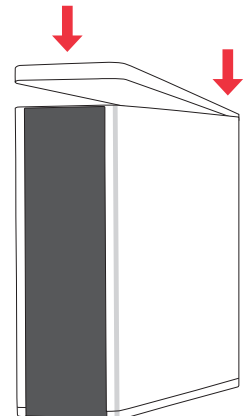

2

Open the faucet on the countertop to release all pressure to the Tankless Reverse Osmosis System, and leave the faucet open until you have replaced the required filters.

3

Press down on the magnetic top of the Tankless Reverse Osmosis System to remove the magnetic covering and reveal the filters. Place the cover with the screen facing up to not damage the cover.

# Tankless Reverse Osmosis System Filter Replacement

● #1 Pre-Filter (Black)  
● #2 Carbon Filter (Dark Grey)

● #3 Reverse Osmosis Membrane (Blue)

THIS PACKAGE CONTAINS YOUR PRE-FILTER, CARBON FILTER, AND REVERSE OSMOSIS MEMBRANE FOR YOUR TANKLESS REVERSE OSMOSIS SYSTEM. PLEASE FOLLOW THE STEPS BELOW TO REPLACE YOUR FILTERS AND MEMBRANE.

## Stage 2: Replacing Filters

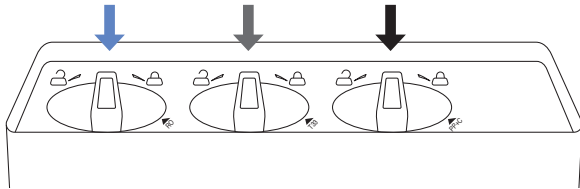

### #1 Pre-Filter, #2 Carbon Filter and #3 Reverse Osmosis Membrane

NOTE: Your Pre-Filter, Carbon Filter and Reverse Osmosis Membrane will arrive in an encasing that is designed to make the filter change process as simple as possible.

#3  
REVERSE  
OSMOSIS  
MEMBRANE

#2  
CARBON  
FILTER

#1  
PRE-FILTER

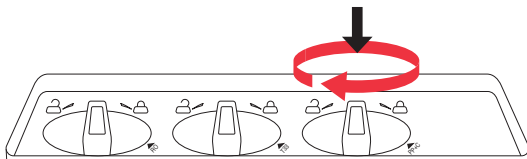

1

Grab the Pre-Filter by the handle and turn the filter counter-clockwise until the arrow points to the unlocked symbol and pops out.

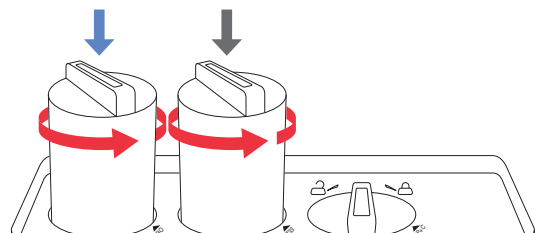

2

Pull the old filter out and dispose of in the trash. Insert the new filter, ensuring the arrow aligns with the "unlocked symbol" before turning it clockwise and securing the new filter into place.

3

Repeat Step 1 for the Carbon Filter and the Reverse Osmosis Membrane.

# Tankless Reverse Osmosis System Filter Replacement

● #1 Pre-Filter (Black)  
● #2 Carbon Filter (Dark Grey)

● #3 Reverse Osmosis Membrane (Blue)

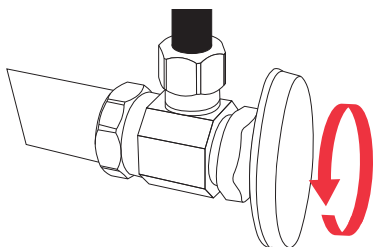

THIS PACKAGE CONTAINS YOUR PRE-FILTER, CARBON FILTER, AND REVERSE OSMOSIS MEMBRANE FOR YOUR TANKLESS REVERSE OSMOSIS SYSTEM. PLEASE FOLLOW THE STEPS BELOW TO REPLACE YOUR FILTERS AND MEMBRANE.

## Stage 3: Pressure Test, Purge, and Filter Reset

NOTE: After reassembling the Tankless Reverse Osmosis System, follow the steps below to perform a pressure test, purge and filter reset before use.

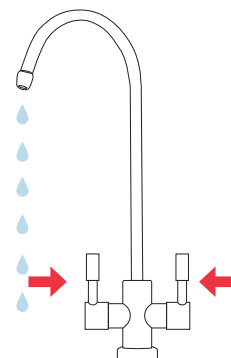

1

Open the main shut-off valve on the cold water supply line by turning it clockwise.

2

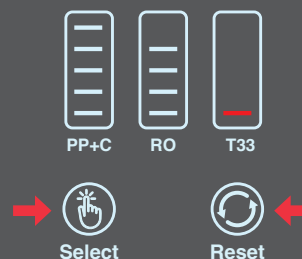

Let the water run out of the countertop faucet for 10-15 minutes from the Reverse Osmosis side (right tap) of the faucet and another 10-15 minutes from the purified side (left tap) of the faucet.

3

To reset the Pre-Filter, RO Membrane, and Carbon Filter:

- Press the "RESET" button for 3 seconds until you hear a beep then release.
- Use the "SELECT" button and select "PP+C" (for Pre-Filter)
- Finally, press and hold the "RESET" button again for 3 seconds to complete the process of resetting the filter on the unit.
- To reset the RO and Carbon Filter, repeat all the steps and select "RO" and "T33" (for Carbon Filter) in step b above. Once all filters have been reset, the unit is ready to use.
